All updates have been highlighted within the paper, and it was noted that the Strategic Risk Register has been reduced to hold 20 risks. SM advised that further work has also been taken across the organisation to mature both Divisional and Branch Risk Registers.
- 3.3. Risk appetite and tolerance has also been reviewed and agreed by the Executive Team, and for some risk categories this will be reviewed again in three months to take account of the impact of Covid-19.
- 3.4. The Risk Review Group continue to meet and have added a new standing item, Horizon Scanning, to enable them to seek support when reviewing and managing risk.
- 3.5. The Audit and Assurance Committee noted the Risk Management update and highlighted the following:
 - Remote Working – assurance was sought on unauthorised / accidental breaches. JW advised that all laptops are encrypted and there has been an increase in management checks.

Security – it was noted that a risk on security had been closed and the Committee asked for further clarification prior to the next meeting on why. Many felt this was still a concern and wanted assurance it was being managed. SM advised it was but had been de-escalated to a Branch Risk Register.

- 3.6. Finally, while the Committee appreciated the level of information provided on risk, it was agreed that the Risk Function would review the information provided to the Committee to ensure it was focused and directed on where there advice would add value and to ensure that it was complete and up to date.
