

## Executive Advisory Board Paper/Executive Team etc

The author must complete this page before submitting the paper to the Business Support Office.

### Publication

To demonstrate openness and transparency, all governance group papers will now be published on the website of Social Security Scotland. All governance group papers should be written in line with the Writing for Publication Guidance.

Papers which contain sensitive information which should not be published must set out the reasons why. The author must identify the relevant exemption which should apply. The exemption should be stated in the section below, with the reasoning for this decision. Please speak to the Data Protection and Information Governance team before submitting your paper if you are unsure which exemption may apply.

1. I am aware that this paper may be published in the public domain and I am content for the information to be published.
2. I believe information in this paper should be withheld from publication and that an exemption applies.

2.1. Please state the exemption and explain your reasoning:

An exemption under Section 30(c) is considered to apply to the withheld information. The paper contains information which relates to the security team size, organisational structure, defensive capabilities and the overall maturity of the cyber security function. This information would be used by those who seek to disrupt the capabilities and function of Social Security Scotland. The information would be used to facilitate an attack and anticipate the responses from the security team. The Public Interest Test has been considered and whilst release of the information withheld would help inform the public about our capabilities to prevent attacks, the public interest is outweighed by the need to ensure the integrity of the systems which facilitate the delivery of the benefits system in Scotland and the protection of the personal data of our clients.

Paper Summary for Website Publication (max 100 words)

The paper is a discussion between the Digital Risk and Security Team and the Executive Advisory Board and is framed around the National Cyber Security Centre's, "5 questions for your Board's agenda."

Paper authors should write a short paragraph here to summarise the content of the paper.
